

AP Maturity

OPTIMIZE YOUR CONCRETE PRODUCTION

WHAT IS AP MATURITY?

AP Maturity is an online calculation tool that estimates and documents the maturity and strength of a concrete structure, using temperature measurements made by a data logger. AP Maturity is used e.g. to optimize element production, and can be used by anyone working with concrete structures.

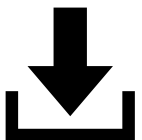

BENEFITS OF APPLYING AP MATURITY:

- Optimize production.
- Avoid waste by demolding at the optimum time.
- Avoid storing sample cylinders by the mold.
- Data history and insight.

AP MATURITY GIVES YOU ANSWERS:

- When can I demold it?
- Can I avoid coverage after demolding?
- Can I lift the item?

ONLINE ACCESS AND LOCAL DATA STORAGE

AP Maturity is accessible online and does not require installation. Data is stored in the program and can be stored locally.
